

We at Discover In believe:

- Every child is unique
- Every child is talented
- Every child is capable to excel

But we need to know **what is unique in them, where they are talented and how they can excel in their strengthen areas.**

Discover your child's inborn talent through a new technology Dermatoglyphics Multiple Intelligence Analysis (**DMIA**)

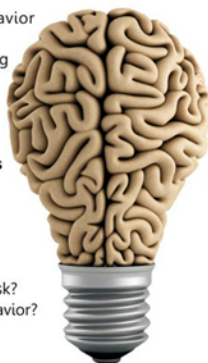

Why Dermatoglyphics Analysis?

In this fast moving and competitive era you are expecting best from your children but unable to understand few aspects of your child. Today, Dermatoglyphics analysis can easily reveal our intrinsic qualities and talents. After discovering child's innate intelligence, parents and educators can easily:

- Discover innate strengths & limitations
- Discover basic Personality type and behavior characteristics of child.
- Enhance learning experience by discovering preferred learning Style of child.
- Make academic and career choices easier.
- build confidence level.
- Reveal hidden talents.

DMIA Analysis also answers few common questions of parents & educators.

- How to improve child's concentration level?
- Why he/she is so hyperactive?
- Why he/she is stubborn in nature?
- Why he/she does not enjoy academic learning?
- Why he/she is careless; can't concentrate on one task?
- What is the reason behind his/her ill-humored behavior?
- Why he/she is shy in nature?
